TOTAL:	

If the entries in the first row of the matrix in problem 2 were 10, 10, 10, and 10, then the highest probability of a tie would be 0.02145. Since 0.02145 is less than 0.05, the highest probability of a tie is 0.02145. If the SPARE is less than 0.05, then the highest number of ties is 1, and the total is independent of the highest number of ties. If the SPARE is greater than 0.05, then the highest number of ties is 2, and the total is independent of the highest number of ties.

[illegible]
